PROFESSIONAL SUMMARY

Junior Software Developer with hands-on experience building scalable full-stack web applications using React.js, Node.js, JavaScript, PHP, and MySQL. Completed a web development internship and delivered production-ready projects demonstrating clean code practices, RESTful API integration, database management, and version control with Git. Currently pursuing MCA at Manonmanium Sundaranar University (2024–2026). Strong foundation in OOP principles, Agile development, and cross-functional team collaboration. Eager to contribute to scalable software solutions under senior mentorship.

TECHNICAL SKILLS

Languages	Python, JavaScript, PHP, Kotlin, C++, Java (basics)
Web Technologies	HTML5, CSS3, React.js, Node.js, RESTful APIs, Responsive Design
Database	MongoDB, MySQL, Firebase
Tools & Platforms	VS Code, Android Studio, Git, GitHub, Agile / Scrum

WORK EXPERIENCE

Web Development Intern June 2025
[Dhatchan Academy](#) — Tamil Nadu, India

- Designed and developed responsive web applications using HTML5, CSS3, and JavaScript, writing clean, scalable code and ensuring cross-browser compatibility.
- Collaborated with cross-functional teams to build, debug, and ship frontend components for client projects, ensuring smooth functionality and user-friendliness.
- Integrated RESTful APIs and third-party tools to streamline data handling and submission workflows across web applications.
- Applied version control using Git and GitHub throughout the development lifecycle.

PROJECTS

Voucherly – Desktop Invoicing Application | *Electron, React, Node.js, Vite, IPC, JSON*

- Developed a cross-platform desktop application using Electron and React.js, following OOP principles and clean code practices to build a scalable, offline-first solution for small businesses.
- Implemented a multi-business management system enabling users to handle separate company data within a single application instance.
- Built a custom local data storage engine using Node.js filesystem APIs and Electron IPC, optimising performance and ensuring secure, server-free data handling.
- Designed invoice creation, duplication, and smart search features to streamline recurring billing workflows and improve operational efficiency.

Fitness Application — Personalised Workout Generator | *Android (Kotlin), Firebase, XML*

- Built an Android application that generates personalised workout splits based on user age, fitness goals, and health conditions.
- Integrated Firebase Authentication and Realtime Database for secure user login and persistent data storage.
- Designed clean, accessible user interfaces using XML layouts following Android Material Design guidelines.

Intern Management System (IMS) | *PHP, MySQL, Bootstrap 5, JavaScript, AJAX*

- Built a scalable full-stack web application using PHP, MySQL, JavaScript, and Bootstrap 5 to manage the internship lifecycle including task assignment, progress tracking, and performance evaluation.
- Implemented role-based access control (Admin, Team Lead, Intern) to deliver secure and customised dashboards for each user type.
- Managed database design, queries, and performance optimisation using MySQL to handle task records, deadlines, submissions, and feedback efficiently.
- Created backend logic to auto-calculate performance scores based on task completion rates, deadlines, and supervisor ratings.

EDUCATION

Master of Computer Applications (MCA) Manonmanium Sundaranar University, Tamil Nadu	2024 – 2026
Bachelor of Science in Computer Science St. John's College Grade: A	2021 – 2024

CERTIFICATIONS

Angular 7 – Front-End Development	
Artificial Intelligence	April 2025
Blockchain Basics	June 2025 (Valid: June 2026)
Data Analytics – 30-Day Masterclass	Dec 2024 – Feb 2025
Enhancing Soft Skills and Personality	Feb – Apr 2025
Front-End Development (HTML/CSS)
